Contents Volume 201 (1998)

Black alder (*Alnus Glutinosa* (L.) Gaertn.) trees mediate methane and nitrous oxide emission from the soil to the atmosphere
H. Rusch and H. Rennenberg **1–7**

Growth of arbuscular mycorrhizal mycelium in calcareous dune sand and its interaction with other soil microorganisms as estimated by measurement of specific fatty acids
P.A. Olsson, R. Francis, D.J. Read and B. Söderström **9–16**

Effects of far-red light on the growth, mycorrhizas and mineral nutrition of Scots pine seedlings
T.M. de la Rosa, P.J. Aphalo and T. Lehto **17–25**

Root dynamics at drained peatland sites of different fertility in southern Finland
L. Finér and J. Laine **27–36**

Temporal and spatial root development of cauliflower (*Brassica oleracea* L. var. *botrytis* L.)
K. Thorup-Kristensen and R. van den Boogaard **37–47**

The dynamics of carbon in particle-size fractions of soil in a forest-cultivation sequence
J. Balesdent, E. Besnard, D. Arrouays and C. Chenu **49–57**

The phenology of fine root growth in a maple-dominated ecosystem: relationships with some soil properties
B. Côté, W.H. Hendershot, J.W. Fyles, A.G. Roy, R. Bradley, P.M. Biron and F. Courchesne **59–69**

Biofumigation potential of brassicas. I. Variation in glucosinolate profiles of diverse field-grown brassicas
J.A. Kirkegaard and M. Sarwar **71–89**

Biofumigation potential of brassicas. II. Effect of environment and ontogeny on glucosinolate production and implications for screening
M. Sarwar and J.A. Kirkegaard **91–101**

Biofumigation potential of brassicas. III. *In vitro* toxicity of isothiocyanates to soil-borne fungal pathogens
M. Sarwar, J.A. Kirkegaard, P.T.W. Wong and J.M. Desmarchelier **103–112**

Carbon and nutrient dynamics in relation to growth rhythm in the giant bamboo *Phyllostachys pubescens*
R. Li, M.J.A. Werger, H.J. During and Z.C. Zhong **113–123**

Effect of dsRNA-containing and dsRNA-free hypovirulent isolates of *Fusarium oxysporum* on severity of Fusarium seedling disease of soybean in naturally infested soil
O. Kilic and G.J. Griffin **125–135**

Iron-dependent oxygen free radical generation in plants subjected to environmental stress: toxicity and antioxidant protection
M. Becana, J.F. Moran and I. Iturbe-Ormaetxe **137–147**

Field observations on nitrogen catch crops. II. Root length and root length distribution in relation to species and nitrogen supply
J. Vos, P.E.L. van der Putten, M.H. Hussein, A.M. van Dam and P.A. Leffelaar **149–155**

Methane flux in relation to growth and phenology of a high yielding rice variety as affected by fertilization
S. Singh, A.K. Kashyap and J.S. Singh **157–164**

Distribution and chemical speciation of aluminum in the Al accumulator plant, *Melastoma malabathricum* L.
T. Watanabe, M. Osaki, T. Yoshihara and T. Tadano **165–173**

Nutritional characteristics in leaves of native plants grown in acid sulfate, peat, sandy podzolic, and saline soils distributed in Peninsular Thailand
M. Osaki, T. Watanabe, T. Ishizawa, C. Nilnond, T. Nuyim, C. Sittibush and T. Tadano **175–182**

Effect of acidulation of high cadmium containing phosphate rocks on cadmium uptake by upland rice
S.N. Iretskaya, S.H. Chien and R.G. Menon **183–188**

Growth and biochemical alterations in coffee due to selenite toxicity
P. Mazzafera **189–196**

Effect of tree species and crown pruning on root length and soil water content in semi-arid agroforestry
M. Jones, F.L. Sinclair and V.L. Grime **197–207**

Belowground structure and production in a Mediterranean sand dune shrub community
F. Martínez, O. Merino, A. Martín, D.G. Martín and J. Merino **209–216**

Chemical composition of throughfall, soil water, leaves and leaf litter in a beech forest receiving long term application of ammonium sulphate
K.J. Meiwes, A. Merino and F.O. Beese **217–230**

Influence of plant morphology on root exudation of maize subjected to mechanical impedance in hydroponic conditions
V. Groleau-Renaud, S. Plantureux and A. Guckert **231–239**

Effects of bacteria on mycorrhizal development and growth of container grown *Eucalyptus diversicolor* F. Muell. seedlings
W.A. Dunstan, N. Malajczuk and B. Dell **241–249**

Soil organic carbon and nutrient status in old-growth montane coniferous forest watersheds, Isla Chiloé, Chile
D.J. Zarin, A.H. Johnson and S.M. Thomas **251–258**

Understanding allocation to shoot and root growth will require molecular information about which compounds act as signals for the plant nutrient status, and how meristem activity and cellular growth are regulated: Opinion
M. Stitt and W.-R. Scheible **259–263**

Root growth and water uptake during water deficit and recovering in wheat
S. Asseng, J.T. Ritchie, A.J.M. Smucker and M.J. Robertson **265–273**

Does tolerance of wheat to salinity and hypoxia correlate with root dehydrogenase activities or aerenchyma formation?
J. Akhtar, J. Gorham, R.H. Qureshi and M. Aslam **275–284**

Conditions controlling relative uptake of potassium and rubidium by plants from soils
U. Drobner and G. Tyler **285–293**

Water-use efficiency and transpiration efficiency of wheat under rain-fed conditions and supplemental irrigation in a Mediterranean-type environment
H. Zhang, T.Y. Oweis, S. Garabet and M. Pala **295–305**

Modelling the influence of assimilate availability on root growth and architecture
P. Thaler and L. Pagès **307–320**

Volume contents **321–323**

Author index **324**
